 #EOTEP

EFORT Webinar | Surgical Treatment of Lumbar Disk Herniation

Monday 28 October 2019 | 19:00-20:00 Central European Time

This webinar will address the following topics:

Natural History

Zdenec Klezl ([United Kingdom](#))

Correlation between Imaging and Symptoms

Jean Charles Le Huec ([France](#))

Surgical Options

Pedro Berjano ([Italy](#))

Learning objectives:

To know the natural history of lumbar disk herniation and understand whether the treatment modifies it.

Be aware that the correlation between imaging and symptoms is controversial and the value of imaging is often overestimated.

Be conscious that surgical options must be critically evaluated in order to choose the best treatment with solid scientific basis.

This Webinar is organised by the EFORT Orthopaedic Education Group independent of any commercial educational support and hosted by m-events.
