# 27<sup>th</sup> International Meeting on Advanced Spine Techniques (IMAST)

# IMAST 2020

The 27<sup>th</sup> IMAST is open to anyone involved in the treatment of spinal disorders including spine surgeons, residents and fellows, physician assistants, nurses and other allied health professionals, and researchers. The presentations selected will provide valuable information to all individuals caring for patients with spinal disorders.

- Program focused on innovative and new methods/techniques for treating spinal pathology beyond deformity
- Program divided equally between adult deformity, pediatric deformity, degenerative lumbar and cervical pathology
- Features Free Papers, E-Posters, Hands-On Workshops, Roundtable Discussions, Debates, Video Techniques, Complications Series and Instructional Course Lectures
- 2.5 - day program including papers, commercial exhibits and demonstrations
- One-year clinical follow-up required for free paper submissions
- **Topics focus on new and advanced techniques for treating a wide range of spinal conditions**
